Chika Ugonna Okafor

Intelligent Automation Engineer | RPA (UiPath) · Python · LLM Workflows

Lekki, Lagos, Nigeria | +234 803 426 9507 | okaforchika66@gmail.com | [LinkedIn URL] | [GitHub URL]

Professional Summary

Intelligent Automation Engineer with 5+ years of experience in banking, having delivered 50+ automation projects and supported 100+ production processes using UiPath. Each project saves 4+ hours of manual effort. Combines enterprise RPA with Python, REST APIs and LLM-based workflows (LangChain, n8n, OpenAI API) to automate financial operations such as reconciliation, settlement and reporting. Experienced working with solution architects, business analysts and testers across the full automation lifecycle.

Core Skills

- **RPA & Automation:** UiPath (Studio, Orchestrator, REFramework), attended and unattended bots, end-to-end process automation, workflow monitoring and optimization
- **AI & Intelligent Automation:** LangChain, RAG, prompt engineering, OpenAI API integration, n8n, AI-powered workflow automation
- **Programming & Data:** Python, SQL (T-SQL, PostgreSQL, MSSQL), JavaScript, C#
- **Integration & Tools:** REST APIs, Postman, Git, Power Apps, Power Automate, Node.js, Express.js
- **Frontend:** React (TypeScript), Tailwind CSS

Professional Experience

RPA Developer | Zenith Bank PLC

April 2021 – Present

- Designed, built and deployed **50+ UiPath automation projects** for financial operations, saving **4+ hours of manual effort per project**.

- Supported **100+ production processes** across deployment, hypercare and ongoing monitoring, keeping bots stable and reliable.
- Automated data reconciliation, settlement workflows and reporting pipelines, reducing manual workload for operations teams.
- Extended RPA workflows with Python scripts and REST API integrations, enabling automation beyond UI-level interactions.
- Built AI-powered chatbot prototypes and LLM integrations (summarization, automation, decision support) using LangChain, n8n and the OpenAI API.
- Developed internal tools with Power Apps and Power Automate, and React dashboards for monitoring and reporting on automation performance.
- Partnered with solution architects and business analysts to sign off business and technical requirements and contribute to solution design.
- Led QA and UAT testing, debugging and post-deployment monitoring, and produced technical documentation following RPA best practices.

Operations Support Engineer | Hamilton Technologies Ltd.

August 2019 – November 2020

- Performed laboratory testing of drilling fluids and supported engineers at the rig with reporting, logistics, inventory and documentation.

Education

B.Eng. Chemical Engineering, First Class Honours | University of Benin, Nigeria | 2013 – 2018

Certifications

- UiPath RPA Developer (Advanced)
- UiPath RPA Developer (Foundation)
- ITIL 4 Foundation
- IBM: Python for Data Science, AI & Development; Databases and SQL for Data Science with Python

Projects

- [Project 1: RAG chatbot over documents | live demo + GitHub link]
- [Project 2: n8n / agentic workflow with LLM | demo + GitHub link]
- [Project 3: UiPath + LLM hybrid automation | demo + GitHub link]
